

HEKSERI hails from Eastern Massachusetts, an enclave of traditional demonic evil. The band plays punishing and dynamic black thrash metal in the vein of IMMORTAL, KREATOR, and VENOM.

Hekseri (the Norwegian word for 'witchcraft') formed in 2004, and have assaulted audiences throughout New England, amidst a still growing resurgence of Black Thrash Metal bands.

"Down to earth thrashing black metal from New England . . . fast guitar patterns and solid bass drums frameworks gives you the right picture about Hekseri's musical madness. The tempo in the songs is above all quite high, but there are also some noticeable oppressive slower passages in the music. The vocals consist almost of insane schizophrenic growled screams brings the needed madness and brings even more variation . . . combined to form a quite unique and massively enjoyable death / black / thrash metal hybrid. Hekseri are definitely a very nice surprise."
